11Lemon - Cherry Lemonade Seeds

The Cherry Cobbler, that was used in this cross, is an Indica-dominant (80-20%) Hybrid strain known for its sweet, nutty, and cherry-forward flavour profile. It was made using *Girl Scout Cookies and Cherry Pie*, often described as smelling like a fresh-baked dessert. This characteristic transferred well to the offspring in the cross to Lemon Face. Lemon Face, another cross made by 11LemonGenetics is a more balanced Hybrid that combined original Archive Seeds Face Off genetics with *Top Dawg's Star OG*, a potent combination of *Loompas Headband and Star Dawg*.

The vegetative growth is above average and plants have strong stems that need minimal staking or trellis with perfect spacing between flowers for high yield but spaced enough for air movement to prevent mold and mildew. It is an easy to medium difficulty plant to grow and is well suited for people new to the craft to learn without the high risk of failure present in many exotic Hybrids.

BC Weed Co - Pink Lily Live Resin AIO Disposable

THC: 76% CBD: 0.1%

Pink Lily Vape is a true BC-built project from start to finish — cultivated in British Columbia using fully organic practices, extracted in BC, and assembled using premium hardware selected to showcase the oil properly.

Made with full-spectrum extract, Pink Lily preserves the plant's natural terpene expression for a richer flavour profile and a more authentic experience than standard distillate formats. The result is a smooth, terpene-forward inhale with depth, body, and character.

On first draw, expect bright floral sweetness layered with soft citrus and subtle fruit notes. As the profile develops, warm earth, gentle spice, and a clean herbal finish round out the experience. Aromatics are expressive yet balanced — floral lift up front, supported by deeper resinous undertones.
